

THE WORLD OVER

GERMANY DECLARES MORATORIUM

WINTER WEATHER 64 P.G. NORMAL

JAPAN SAYS SHE MAY BOYCOTT

VEREGIN MAY HAVE TO LEAVE

STUBBS TO RUN UNDER C. G. F.

BERLIN—Germany has declared a moratorium on credits granted to the Reich before July 1933, thus admitting her inability to pay in foreign currencies either the interest or the amortization charges on some 17,800,000,000 marks (currently \$4,824,000,000) of foreign indebtedness. The moratorium will operate for the debt owed to foreign treasuries. Existing standstill agreements with private creditors abroad are not affected.

WASHINGTON—Winter wheat production this year was forecast at 211,000,000 bushels on Friday by the United States department of agriculture, basing its estimate on the condition of the crop on June 1st, which was 64 per cent of normal. A month ago the crop was forecast at 217,465,000 bushels on a condition of 66.7 per cent of a normal.

TOKIO—On the eve of the World Economic Conference in London, the clouds of an impending financial crisis were between two great empires, namely, involving Canada, are overshadowing Asia. A boycott is threatened against raw cotton from India under a decision of the Japan Cotton Spinners' Federation emergency committee in retaliation for India's recent increase recently in duties on non-British cotton cloth.

WINNIPEG—Possible deportation of Peter Veregin, socialist and temporal leader of the 14,000 Canadian laborers, was arrested and detained by immigration officials on a warrant issued by Hon. W.A. Gordon, minister of immigration. Bail was refused the chief pending a forthcoming hearing.

According to a judgment of the supreme court of Canada handed down in March, Veregin is still subject to deportation in spite of the decision of Mr. Justice Humphrey Mellish, of the Nova Scotia supreme court, halting the minister's deportation in January. He had been released from Prince Albert jail, after serving less than six months of an 18-month sentence for perjury.

SASKATOON—Former Judge L. St. G. Stubbs, removed recently from the Manitoba judiciary by order-in-council following perjury by the federal cabinet in the case of Commissioner P. of Calgary, into the judge's conduct while on the bench, on Friday was nominated to contest the Mackenzie constituency in Saskatchewan in the interests of the new Canadian Commonwealth Federation party.

Mr. Stubbs will thus have the honor of being the first candidate to carry the colors of the new political party headed by J.S. Woodsworth, M.P., of Winnipeg, into the active political arena.

The vacancy in Mackenzie constituency was caused by the appointment of Milton Campbell, Progressive, to the Canadian Parliament.

LONDON—The great world economic conference, to which the nations of the world have long looked for a way out of their present troubles, was hardly under way on Monday when the action were apparent. It was understood from highly authoritative sources that an agreement in principle had been reached in the preliminary stages of the conference was near.

After outlining the prime of the world and declaring emphatically that "it cannot go on," the prime minister surprised the United States delegation by changing into the question of war debts.

Knock them down with Flykill and they stay down.

CARBON WINS TENNIS MATCH FROM ACME

The Carbon Lawn Tennis Club entertained the Acme Club at Carbon on June 11th at Carbon, when the usual schedule of games was played, resulting in a win for Carbon by seven sets to nil.

Some of the events were closely contested, especially the Ladies' Singles between Miss Mabel Ramsey of Carbon and Miss Pearl Fowler of Acme, which was one of the most interesting matches seen here for some time.

Carbon gave a trial to two of their junior players in the Mixed Doubles, B. Wile, aged 13, and Miss A. Wile, and they came through in great style. The following are the results and scores:

Men's Singles—W. Foxon of Carbon defeated C. Wile of Acme 4-6, 6-3, 6-3. Ramsey of Carbon defeated C. Wile of Acme 4-6, 6-3, 6-3. Men's Doubles—W. Foxon and Bruce Ramsey of Carbon defeated C. Smith and J. McInnes of Acme 6-2, 6-1, 6-3. Women's Singles—Miss M. Ramsey of Carbon defeated Miss P. Fowler of Acme 4-6, 6-3, 6-3. Ladies' Doubles—Miss M. Ramsey of Carbon defeated Miss P. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

Miss M. Ramsey of Carbon defeated Miss E. Fowler and Miss E. Fowler of Acme 4-6, 6-3, 6-3.

E. J. GARLAND, M.P.

Who will address the public at the G.F.A. Sports Day on Wed., July 5.

GOLF COURSE SHOULD BE FINE FOR WEEK END

The work on the greens of the Carbon Golf course has now been completed and the sand and oil greens are in better shape than they have been for years. Mr. Reed is planning about a thousand head of sheep over the course this week and by Saturday the course should be in pretty fair condition for playing.

All persons in the district who intend to play golf this year are asked to get in touch with the secretary, E. J. Boush, immediately and pay their fees. There has been considerable work done for the benefit of players and all accounts must be paid from June 1st. The fees for men are \$2.50; Ladies and school children, \$1.00.

ALBERTA NEWS

Controlling Motor Boat Traffic

Special regulations controlling motor boats on lake resorts in Alberta have been made effective by the Alberta government. These require all motor boats to be licensed, to have mufflers and in recognized races, to have proper lights, and they make provision also against the reckless or negligent operation of motor boats, and against speeding save in racing.

Alberta's Wrigley Swim

The Wrigley Swim for the province of Alberta will take place this summer, July 2nd, at Sylvan Lake, one of the largest lake resorts in Alberta, just west of Red Deer city, on a gravelled highway. In conjunction with this event, a large regatta will be held.

FORAGE CROPS FIELD DAY AT LACOMBE ON JUNE 22

Thursday, June 22, will be the annual Forage Crops Field Day at the Lacombe Experimental Station, Lacombe. Suitable grasses and clovers for pasture and hay crops are one of the important problems now before the farmers of Alberta. Wild land pastures and hay fields, almost everywhere, are in a state of neglect, and the numbers of sheep, cattle, sheep and horses requiring pasture and hay are rapidly increasing.

At the experimental station every variety of grasses and clovers which have any prospect of proving suitable for Alberta conditions are under test. Many different methods of seeding, growing and harvesting are also being tested. This spring has been especially favourable for these crops and both plots and field tests are in the very best condition for inspection and many very valuable lessons can be learned.

Coffee, cream and sugar will be provided for a buffet lunch under the trees at 12 o'clock. This will be followed by a brief lecture and a brief inspection of the livestock and the various experimental works. A drive over the Station farm will give an opportunity for seeing the various forage crop rotations, and the main discussion will be given at the forage crop test plots.

Those who are having some farm with you who has never before visited the Experimental Station.

Huxley to Grainger U.F.A. Meeting Held Here June 3

Drumheller Masons Visit Carbon Lodge

At the invitation of Carbon Lodge, A.P. and A.M. several members of Drumheller Lodge visited Carbon last Tuesday evening to pay a fraternal visit. The party consisted of: C. N. Jamieson, W. R. Fulton, J.D. Dewar, W. Gough, H.A. Brown, G.H. Barker, E.P. Baker, C.G. Drown, W.H. Winter, K.S. Shannon, K.H. Hansen, W. Tordis, J. C. Chisholm, N. Ball and J.H. Watson (Symol Lodge). A downpour of rain compelled the Drumheller Masons to return before the conclusion of the lodge session.

It was decided to hold a special meeting in Three Hills in conjunction with the Board of Trade on June 27th when Wm. Aberhart will speak on the "Open Mind." Carried.

Mr. Claydon was called upon, but Miss Turner soon arrived and he asked that she be given the platform. Miss Turner then read the program, which was the human race in its fight for better social conditions. She gave Turner's 14 ways of making money legally, though some of them were more to robbery. She said there was a large turning to the C. F. view of the world. This has produced a germination and rapid growth. Seedling of all grains is nearing completion. A decrease of approximately 7 per cent in wheat acreage is indicated. In most of the other provinces favourable weather conditions have speeded field operations and given a good start to the earlier crop.

Northern Alberta—Wheat seeding has been completed; seeding of coarse grains is expected to be finished this week. Southern Alberta—Seeding has been completed and growth is satisfactory with no soil drifting or other damage.

Western Alberta—Wheat seeding has been completed; seeding of coarse grains is well advanced. Grass on the ranges, alfalfa on irrigated lands and sugar beets are all showing good growth.

Northern Saskatchewan—Seeding of wheat has been practically completed. Seeding of coarse grains is well advanced. There is sufficient moisture in the soil to insure the growth of the grain. Southern Saskatchewan—Wheat has all been sown and is showing well above the ground. Coarse grains are nearly all sown. Moisture conditions are satisfactory but subsoil reserves are only a few districts. Grasshopper plagues are reported to be numerous in several districts.

Small trout which have been injured about the gills by the anchor hook will soon recover. In many cases at least if they are promptly freed and put back into the water.

This statement may be contrary to a belief which is perhaps quite widely held but tests made by a Canadian investigator have indicated that it is true, and apartment who happen to land small trout when fishing for the high season should make it a point to get them back into the water at once so that they may have a chance to recover and mature and help to ensure the supply of smaller later on. In some cases, of course, the fisheries regulations provide that trout under 10 inches in length must be returned to the stream or lake but, regulations aside, it is good sportsmanship to put back the small fish in the water so that they may help to maintain the angling resources.

FROST DAMAGE IS HEAVY IN THE CARBON DISTRICT

Bone Wheat in Rockford District Reported Damaged by Frost

GARDENS SUFFER MOST LOSS

A heavy frost visited the district on Thursday night and Saturday night respectively last week and did considerable damage throughout this area. Farmers in the north report that a slight damage was done to wheat, although little loss, if any, will result. To the south in the Rockford district, however, considerable damage was done to wheat, the Hutterite colony reporting that some hundred bushels of their wheat was badly damaged.

The gardens suffered the most damage from the frost and in almost every case potatoes, beans and other tender plants were badly frost bitten. Reports from garden damage from frost come from every part of the district, as the frost was by no means subject to the valley.

With plenty of moisture and the real warm days now at hand all products of the soil are growing rapidly and within a couple of weeks frost bitten plants will be fully recovered.

For twenty-seven years Rexall's has been the accepted relief for constipation. Because of their delightful chocolate taste children love them and because of their gentle laxative action they are appreciated by women and elderly people. And how they activate sluggish bowels. Only nature could be kinder. Rexall's Ointment is non-habit forming. Get them at McKibbin's Rexall Drug Store. Tin of 50-cs.

REGULAR CROP REPORT, BANK OF MONTREAL

General—The lateness of the season has been largely offset throughout the Prairie Provinces by the warm weather and abundant rainfall of the past week. This has produced a germination and rapid growth. Seedling of all grains is nearing completion. A decrease of approximately 7 per cent in wheat acreage is indicated. In most of the other provinces favourable weather conditions have speeded field operations and given a good start to the earlier crop.

Northern Alberta—Wheat seeding has been completed; seeding of coarse grains is expected to be finished this week. Southern Alberta—Seeding has been completed and growth is satisfactory with no soil drifting or other damage.

Western Alberta—Wheat seeding has been completed; seeding of coarse grains is well advanced. Grass on the ranges, alfalfa on irrigated lands and sugar beets are all showing good growth.

Northern Saskatchewan—Seeding of wheat has been practically completed. Seeding of coarse grains is well advanced. There is sufficient moisture in the soil to insure the growth of the grain. Southern Saskatchewan—Wheat has all been sown and is showing well above the ground. Coarse grains are nearly all sown. Moisture conditions are satisfactory but subsoil reserves are only a few districts. Grasshopper plagues are reported to be numerous in several districts.

Small trout which have been injured about the gills by the anchor hook will soon recover. In many cases at least if they are promptly freed and put back into the water.

This statement may be contrary to a belief which is perhaps quite widely held but tests made by a Canadian investigator have indicated that it is true, and apartment who happen to land small trout when fishing for the high season should make it a point to get them back into the water at once so that they may have a chance to recover and mature and help to ensure the supply of smaller later on. In some cases, of course, the fisheries regulations provide that trout under 10 inches in length must be returned to the stream or lake but, regulations aside, it is good sportsmanship to put back the small fish in the water so that they may help to maintain the angling resources.

The People Must Pay.

Few, if any, subjects are engaging the attention of people in Canada, as in most countries, as closely as the subject of taxation. The rising burden of tax is a matter of deep concern to all. Fortunately, it is receiving serious consideration, not only by those responsible for the administration of public affairs, but by individual citizens.

Taxation in our modern democracies is by no means a simple problem. It is cumulative in effect, and its control is extremely difficult. Every governing and administrative body set up imposes a measure of taxation upon all of us, and, in addition, there are many calls upon people which, while voluntary in one sense, constitute, in the final analysis, a form of taxation.

First, we have Federal taxation, direct and indirect, and levied in a great variety of ways through such agencies as the tariff, excise duties and taxes, sales taxes, income taxes, stamp taxes of various kinds, license fees. Provincial Legislatures follow with a second income tax, land taxes, amusement taxes, license fees to be paid for this, and the other almost without number. Then the municipalities place another tax on lands, on improvements thereon, some levy a third income tax, some an additional amusement tax, all of them more license fees to charge. The school boards impose further tax to meet the costs of education.

Hospitals have to be provided for, to some extent this is done through taxation, Provincial and municipal, but often this form of taxation has to be supplemented by voluntary contributions, but which, in reality, are a tax on business and industry. Churches have to be maintained, even though the law may not compel us to do so, and thus people are in effect again taxed if they are willing to be, and most of them are. Philanthropic and charitable organizations and services of all kinds are maintained in the same way.

The cumulative effect is to produce an almost impossible burden, until now we find articles appearing in magazines, financial journals, the daily and weekly newspapers recording the hundreds of millions of debt that have been created, and scores of millions that must be annually raised in taxation, while organizations of all kinds are conducting investigations and studies with a view, to arriving at some means whereby the burden can be lessened, and any further increase avoided.

Prevention of any further increase is an easy matter if the people, who are the sufferers, determine there shall be no further increase. Individuals here they must keep within their incomes, or they are headed for trouble and disaster. Private business knows it must accommodate itself to the income, or it will end in bankruptcy. What individuals and business must realize is that what is true in their respective cases is likewise true in public business.

Many people, possibly a majority of them, who are fully aware that they must live within their incomes, have nevertheless acted in the belief that it was not necessary for the governing bodies created by them, and supported by them, to follow the same course. Rather, people have insisted that their governments, Federal, Provincial, Municipal, should provide this, and that service, and as the people make and un-make governments, the latter have naturally done what they were demanded they should do. But these same governments have no income except the power to tax people, and this they have proceeded to do.

What people must realize is that if they demand of their governments certain services they must be prepared to pay for those services. They cannot have them otherwise, and if they cannot afford to pay for them, then there is only one thing they can do, and must be prepared to do, and that is go without them. That is, in the collective capacity of the people, they must themselves by exactly the same rules as they are forced to recognize and obey as individuals—if they cannot pay they must be prepared to do without what they would like to have and would have if they could afford it.

It is being predicted that the worst of the depression of the last three or four years is over; that things are once again on the up-grade; that better times are slowly but surely developing; that, in a word, the world is beginning to turn that corner which has been said prosperously by harking. Let us all hope so. But when we have reached and turned that corner, and we are once again tempted to demand something of our governments we would like to have, and think they ought to supply, it will be the part of wisdom to pause and consider whether, after all, we can afford to have it, because, no matter what it may be, it will have to be paid for, and paid for by us—the people,—and paid through the medium of taxes in one form or another.

Many glowing promises are frequently made, and are still being made notwithstanding the bitter experience of the past few years, of what the State can, and ought, and will do for all the people if certain principles in administration are adopted. But if these wonderful things are done, the people will pay for them in taxes. And every dollar that people have to pay in taxes is just a dollar less left in their own pockets to spend in meeting their individual tastes and desires, and needs. But they are going to do certain things for themselves as they desire to do them, and pay for them themselves, or they are going to have the State do these things for them, as the State may determine they should be done, and then pay the State in taxes for the service so rendered.

In any event, and under all circumstances, the people will do the paying. They too, can do the ordering. They can order beyond their means, and get into trouble. They can order for themselves, and they are going to need, and desire, and pay for what they order. Or they can order the State to do the ordering as the State may see fit to do, and then pay the bills incurred by the State. And the decision, whether it may be, will be the decision of each and every man acting in his or her capacity as an individual free citizen.

The main point to remember is that there is, notwithstanding the mistaken use of the word, nothing free in this world. Everything has to be paid for, and it is the people who have to foot the bills. Therefore, the day and the manner of settlement should always be kept in mind before the liability, whatever it may be, is incurred.

Colonization Plans

Calgary Families To Be Settled On Land In The North

Under a plan proposed by Calgary city council by Rev. O. P. Brown, president of the Land Settlement Association of Calgary, 30 families on unemployed relief in Calgary would be settled on the land at St. Paul de Metis, north of Edmonton.

The 30 families have made application for the transfer and efforts to bring them under the Dominion Government back-to-the-land scheme are being made, so the colonization scheme can go through.

Sixty per cent of the public school buildings now open in the United States are one-room structures.

MILBURN'S
HEART
NERVE PILLS

Hor Heart Was Weak Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaceburg, Ont., writes:—I was a nervous, shaky, weak, and restless.

I saw your advertisement for Milburn's Heart Nerve Pills and decided to try them although I did not have much faith, but now I am very well, and I feel as they have proved of wonderful help to me.

I am now strong and well again, and am now almost a lost in the house."

Per sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Montreal, Que.

Scientific World Is Reserving Judgment

As To Whether Living Bacteria Is Found In Meteorites

No successful refutation has yet been put forward of the claim of Professor Charles B. Lipman of the University of California that he has found living bacteria in meteorites according to Professor F. E. Lloyd of McGill University, president of the Royal Society of Canada.

While making it clear that he was not committing himself to support of Professor Lipman's theory, Professor Lloyd, who has been in communication with the California scientist, declares that all who know Professor Lipman recognize in him a careful and exact observer who is not given to rushing into half-baked theories. Professor Lloyd declared that Lipman's account seems to indicate that he had taken every precaution he could think of to guard against the accidental transpiring of bacteria into his samples.

The McGill professor also informed The Toronto Star Weekly that an earlier theory of Professor Lipman announcing discovery of life bacteria in coal seams is supported by German scientists, who, incidentally, came to the same conclusions as Professor Lipman.

Like Professor Lloyd the scientific world is still withholding judgment on both cases, although Professor Lipman's announcement as to meteorites is criticized by some who assert that the bacteria must have gotten into the meteorites after they had reached the earth.

Harnessing Sun Power

May Supersede Water Power As A Source Of Energy

Opening ceremonies of the fifth Pacific Science Congress at Vancouver were featured by the radio address of Lord Rutherford, famous Empire scientist, speaking from Cambridge, England.

Harnessing the sun's power may supersede water power as a source of energy in the future if large scale development of a power plant at the Smithsonian Institute, Washington, D.C., proves practical. Dr. C. G. Abbott, secretary of the institute, indicated.

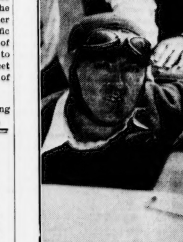

Dr. W. S. Adams, director of the Mount Wilson Observatory, California, outlined his theory that sun spots occur in regular cycles of 11 years. At present, the sun is comparatively exposed to the earth, he said. Dr. Adams discounted any connection between weather on the earth and sun spots.

The annual crop of icebergs from the Greenland glaciers is about 15,000.

A diamond, when chemically pure, is composed solely of the element carbon.

AFTER WINNING THE AUTO CLASSIC

Leila Meyer (right) winner of the 500-mile Memorial Day classic at the Louisiana Speedway, pictured with his machine in their car just after the finish of the grueling race. Meyer, whose victory marks his second triumph in the big event, set a new record for the contest.

Britain Wants Empire Products

Plan To Have Empire Ham and Bacon Plainly Marked

A standing committee established by the British Minister of Agriculture recommended that a marking order be applied to all imported bacon and ham. This means if the committee's recommendation is adopted all foreign ham and bacon will bear the mark "foreign" and all such products from the Empire will bear the mark "Empire" with the name of the country of origin in addition.

Canadian ham and bacon thus would be marked Canada and Empire in block lettering not less than three-quarters of an inch high.

"We are satisfied," the committee reported, "that in absence of adequate marking there are obvious opportunities for substitution of imported bacon and ham and of foreign bacon and ham, and that this fact in itself constitutes a strong reason why the public should be given protection and assistance which a marking order alone could give, and the honest retailer given protection against revival."

It was suggested that as result of propaganda during the past year or two, there is now quite definitely an increasing desire on the part of the public to purchase home or Empire produce as against foreign products and that, in order to meet this desire in regard to bacon and ham, a marking order alone could give, and the honest retailer given protection against revival.

More than 90 per cent of British imports of bacon and approximately 80 per cent of ham imports were of foreign origin in 1932. Of the former, Denmark supplied 67 per cent and of the latter the United States supplied 58 per cent. Empire supplies have been almost negligible in the case of bacon and such supplies as reached the British market came mainly from Canada and the Irish Free State, whose proportions were 1.6 and 1.8 per cent, respectively. In the case of ham Canada supplied 17.8 and the Free State 1.9 per cent.

Portraits Of His Majesty

Five portraits of His Majesty the King were presented to Inspector Sandy Wunch, of the Royal Canadian Mounted Police, by Miss M. F. Mackenzie, regent of the Municipal Chapter of Montreal, I.O.D.E. These portraits are intended for five detachments of the Eastern Arctic sub-division of the R.C.M.P.

The air ministry announcement of the new mark, which will at once discontinue the flying machines, no matter what nation's registration markings they bear, states that the mark is authorized to apply to any aircraft, whether lighter or heavier than air. No fee is required for the authorization.

The first aircraft mark authorized was affixed at the London air station, Croydon, to "Astraea," one of the Imperial Airways fleet.

One Kind Of Deal

Angus—I've made a big deal. I tried to get old horse of mine for a load of hay.

Sandy—But what's the good of the hay if you haven't got a horse?

Angus—The man's good, I lead me the horse long enough to eat up the hay.

The parrots, tortoise, reptiles and birds of prey are found to be the longest lived inmates of the London Zoo.

All the gold mined in the world since Columbus discovered America would amount to about \$22,413,000,000.

During Burglar Still Is Puzzling Detectives

"Glimet" Jimmy Reported To Have Made \$100,000 in Robberies

"Glimet" Jimmy, the most daring—and elusive—burglar in England, who detectives have been trying to capture for 11 years, carried out two robberies involving £1,300 in cash, early on a recent morning with lighted switches.

The problem facing the police in their hunt for Jimmy is that they have no notion of his appearance.

Nor has he ever left behind him a single clue which, in the event of his capture, would definitely establish his identity with his previous crimes.

Only once has a glimpse been caught of him. That was seven years ago when, in carrying out the greatest coup of his career—the raiding of a Deangate, Manchester, bank—the night watchman saw Jimmy for a fleeting instant as he ran past a door making his escape.

But Jimmy, who nearly always conducts his activities to the north of England, has an invariable method of approach.

For weeks he watches and learns the habits of his intended victim, usually a wealthy shopkeeper.

Then comes the night when Jimmy closed extended over 232 days.

First a visit to his victim's house for the keys of the shop and any valuables in the home safe.

Afterwards, armed with the keys, there is the raid on the shop.

On the latest occasion, Jimmy entered the home of W. Smith, of Ashdon-on-Morey, and, without waking the owner, took a bunch of keys from the bedside and opened a safe in the house.

From within which he took £1,300. Half an hour later Jimmy had taken another £1,000 from the safe of Mr. Smith's shop in Gorton.

After whose names of "Glimet" comes from his peculiar method of entering a house through a window, is estimated to have secured more than £100,000 by his burglaries.

A Long Session

Last Session Of Parliament Extended Over 232 Days

The session of Parliament just closed extended over 232 days, including the adjournment from November 25, 1932, to January 30, 1933. Only two sessions since Confederation in 1867 have been longer, the longest being the third session of the 11th Parliament which was held from November 17, 1910, to July 29, 1911, or 255 days. The next longest was the seventh session of the 12th Parliament, which sat from January 18, to October 20, 1917, or 246 days. The third session of the 15th Parliament sat from January 20 to February 19, 1917, or 246 days. The session of the 16th Parliament which sat from August 18, 1914, and prorogued on August 18, 1914, was the same month. Those five days, however, were among the most momentous in Canada's history for in that time the British Dominion decided on the policy to be adopted in connection with the Great War.

British Built Aircraft

Have Been Granted An Official Distinguishing Mark

British-built aircraft have been granted an official distinguishing mark—a lion rampant in gold within three rings of red, white and blue. Within the white ring are inscribed the words, "British Certificate of Airworthiness." The mark has been registered under the Trade Marks Act.

The new mark, which will at once discontinue the flying machines, no matter what nation's registration markings they bear, states that the mark is authorized to apply to any aircraft, whether lighter or heavier than air. No fee is required for the authorization.

The first aircraft mark authorized was affixed at the London air station, Croydon, to "Astraea," one of the Imperial Airways fleet.

Not Affected By Depression

New Zealand Has Steadily Increased Volume Of Exports

The effects of the depression upon New Zealand have been to some extent modified by the success of its efforts to counter-balance falling prices by increasing production. While other countries have been afflicted by rapid contraction of their export trade, in volume as well as in value, New Zealand has steadily increased the volume of her exports. In 1928 exports were 12 per cent greater than in 1926; the official estimates for 1931 show an increase of 20 per cent in five years, and the volume must have been again substantially greater in 1932, for, in spite of a much lower range of prices, the total value was larger than in 1931— Auckland News.

"Jones Minor, your father helped you with this essay?"

"Yes, sir."

"Did he write it all?"

"No, sir. I helped him. I corrected his spelling mistakes."

At the present rates of ice recession, the glaciers of Mount Rainier National Park probably will disappear in a few thousand years.

"In these hard times you can still travel first-class?"

"I have to. I meet my creditors in the third class."

World Famous Scientists Throw Some Light On The Mystery Of The Gulf Stream

Ever since the Gulf Stream was discovered, it has been the subject of speculation among oceanographers. Some of its mystery has even reached the layman. Where does the Stream start? Where does it end? What does it do? The recent return to port of "The Atlantis," the floating research laboratory of the Woods Hole Oceanographic Institution, after a several month cruise in tropical waters, solving much of the deep riddle of the Gulf Stream.

According to data collected by world-famous natural scientists from various institutions who made up the expedition's personnel, the Stream is not, as is popularly supposed, a vast ocean current flowing from the east Atlantic until it strikes the west coast of Africa. At that point, the Trade Winds from Cape Verde and the Equator cause the water to drift westward until it finally reaches the Caribbean Sea.

From there it moves to the Gulf of Mexico, and so completes a long distance circle. This current is in perpetual motion, varying very little in speed to the surface. The Gulf Stream is unknown, for it cannot be calculated just when the temperature of the ocean dropped to the point where the Stream begins to flow. And its possible future is unpredictable, for no scientist has been able to estimate how the Gulf Stream will change in the future.

As a matter of fact, the Gulf Stream is so mysterious that some scientists are so whether the Stream is caused by convection currents, or whether the diurnal turn of the earth on its axis plus its seasonal tilt is responsible for the mighty swirling of the waters of the North Atlantic and neighboring seas.

So, even if the voyage of "The Atlantis" has satisfactorily discovered the Gulf Stream, the mystery of the Atlantic, touches four continents and returns, there is much of the mystery still unresolved.

Tahiti Telephone Girls Have Excellent Memory

Know Names, Addresses, and Movements Of All Subscribers

"Hello, operator, let me have Bill Jones, please."

"He's not at home right now, but I can connect you with Jack Smith's house, where he has just gone up."

"That's the kind of Tahitian telephone service there is today in Tahiti, out in the South Sea, where the operators know the names, movements and addresses of all the telephone subscribers and speak three languages—English, French and Tahitian."

There is no directory, no numbers to bother with, just French and Tahitian were spoken, but since Tahiti has become a paradise for Americans, English can now be used. The salary paid the telephone girls is around thirty dollars a month. At present, there are two operators employed.

New Mail-Carrying Plane

High-Speed Machine Built For British Air Ministry

The newest high-speed mail-carrying airplane built for the air ministry by a London concern is an all metal biplane, with two Bristol "Pegasus" engines. It has a cruising speed of 175 m.p.h. with a top speed of nearly 200 m.p.h.

It will pick up and drop mails in flight. The picking-up gear, it is expected, will be similar to that used by the Royal Air Force—a dropped ball with trailing hook.

Phil Maguire (entering studio): "Who's that fellow over there?" Director: "Why, that's Napoleon." Maguire: "Why did you get such a little man to play such an important part?"—Pathfinder.

Steam from volcanoes runs factories and trolley-cars in Italy.

Canadian Coal For Coke

Research Work Shows Suitability Of Canadian Coal For Producing Coke

Until recently the coke produced in Canada was made exclusively from imported bituminous coals. This caused Canadian bituminous coal operators no little concern, and as an outcome the Department of Mines undertook to carry out extensive tests, in its Fuel Research Laboratory, on coals from both eastern and western Canada. A single unit of a commercial size, horizontal coke oven was erected for the purpose, and the coals were coked alone, and blended both with Canadian and with foreign coals. Efforts were then made to interest operators of coking plants in proximity to suitable bituminous coal supplies in a greater utilization of these commercial plants, which proved beyond doubt the suitability of Canadian coal for the production of a satisfactory coke. At present a number of plants are using Canadian coal exclusively, for the production of gas and coke, while others, operating under more difficult conditions, are using proportions varying from 25 to 50 per cent. It is likely that these proportions will be increased eventually.

System Is Centuries Old

Babylon Had Debt-Adjustment Act To Help Farmers

Governments wrestling with debt-adjustment acts to relieve the farmer and others of debt payments during these days of depression are doing nothing new but using a lot of unnecessary words in their resolutions, amendments and promises.

Centuries ago the debt-adjustment acts and mortuaries and they were worked tirelessly and to the point. Ernest Wilson, Edmonton lawyer, has produced "Paragraph 45, Code of Hammurabi." It was found inscribed on clay tablets by archaeologists in the ruins of Babylon. It follows:

"If a man has incurred debt, and a storm has flooded his field, he shall carry away the crop, or the corn has not grown because of drought, in that year he shall not pay his creditor. Further, he shall postpone his bond and shall not pay interest for that year." The wise and humane Hammurabi was the sixth king of the first dynasty of Babylon. He reigned around 2250 B.C.

Indolized Salt For Stock

Procedure For Mixing It At Home Is Simple

Collier in calves and lambs and hairlessness in pigs is prevalent in those herds where there is a deficiency of iodine in the soil. In such districts the use of potassium iodine in the form of potassium iodide is advised by the Dominion department of agriculture. Commercial iodized salt can be procured, or, if it is desired to mix it at home, the procedure is simple. Spread out 100 pounds of dry common salt evenly on a clean floor, and after dissolving two ounces of potassium iodide in sufficient water, sprinkle the liquid evenly over the salt.

A good rule in feeding salt to swine is to feed one-half pound per pig per month, varying this according to the size and age of the pigs.

Shipyards in Belfast, Ireland, are becoming active again.

CHARMING BLONDE CAPTIVATES MOVIE FANS

Margot Grahame is voted by England's film enthusiasts as the most beautiful screen blonde in British movies. The above picture was taken during her latest picture "Yes, Mr. Brown."

Winnipeg Newspaper Union

By Ruth Rogers

It's young and smart. You can be in a low or wear it in a sporty smart effect. Yellow crinkly crepe silk made this cunning blouse. Wear it for spring with a grey and white summer with a white woolen skirt. A printed crepe silk is smart in grey and white combination. Style No. 704 is designed for sizes 14 to 16. Length 20 inches. 14 to 16 requires 1 1/2 yards of 39 inch material. Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap only carefully.

Little House, Built Over Graves In British Columbia

Under the towering peaks of "Palliser Rocks" mountain range, near Hazelton, B.C., of native graveyard is a blend of paganism and the new faith. Though many of the Indians have been Christianized, complete miniature houses have been built over many of the graves. Clothes and belongings of the departed are placed inside.

In one shrine, shoes, corsets and mirror, brush and comb are hung on the wall. In another, an oil painting stands against a trunk filled with garments and toilet articles. Over children's graves stone poems symbolical of their clan are carved. Food is placed in the houses all month daily. It is invariably carried away by wild animals, such as squirrels and rabbits, but the Indians express the faith that the food through the wild life.

Oldest Woman In World

Irishwoman 122 Has Excellent Memory and Likes To Talk

Mrs. Catherine Brickland, of Bally, county, Ireland, was in a cheerful mood on her 122nd birthday. She is known as the world's oldest woman. She likes to talk, and her memory is excellent although her hearing is a little affected, and her eyesight is impaired as a result of an accident some years ago.

After she had talked about things that happened in her girlhood, she was asked what she thought of Miss 1003 with her dance halls, amusements and dress. There was a long pause, then she said, "I suppose you must have it first."

Born in 1811 at Gashill, Mrs. Brickland has been a worker for over 112 years. When her husband died about 60 years ago she gave up domestic duties and became a breadwinner on a farm near her home.

Mrs. Brickland is looked after by her son, John, who is 68 years of age.

Sixteen National Parks In Canada, The Three Largest Being In Alberta And Saskatchewan

The Laughter Of Animals

Apes Are Only Ones Who Show Amusement In This Way

We have all heard of a "horse-laugh," also of the "laughing hyena," but the only animal that is known to laugh is the little tropical bird called the "laughing jackass," from its astonishing vocal performance.

These, however, are but chance resemblances, and would appear to have nothing to do with feelings of pleasure or amusement. Animals do express these feelings in their own ways; many of them have little to do with the sounds and bodily movements of human laughter.

As we might expect, the large apes come closest to man in this respect. A writer says:

"Can anything make a horse laugh? Certainly some animals are able to feel and express emotions like those expressed in human laughter. But just how much of what man kind would call a sense of humor or other animals can boast is still something of a mystery."

"Like the proverbial 'horse sense,' the idea of a horse laughing may be a bit of a stretch, but there are instances, on the average, than elephants, apes, dogs, or even mules. Certainly, many of the animals supposed to be laughing are doing nothing of the kind. There is, for example, the 'laughing jacks.' Actually, the laughing jacks is a bird, not a horse. It merely happens that its cry sounds like laughing loud and long."

"Still more absurd is the creature called the 'laughing jackass,' which is a kind of bird blessed or cursed by nature with a voice that sounds like the laughing jacks in the throes of maniacal mirth."

"Unofficial observers of animals have recorded the supposed laughing of dogs, cats, calves, elephants, foxes, and at least a score of other animals but it is probable that most of these instances, if not all of them, are mere human illusions."

"It is different, however, with apes, for there is convincing evidence that they are two kinds of apes, most like man, the chimpanzee and the orangutan, can laugh and feel just as much the same way as human beings."

"Animals may have other ways of expressing amusement, or pleasure, but the scientific opinion is on the side of the animals, for naturalists have pointed out innumerable instances in which animals of many kinds evidently feel and express a pleasure and amusement, but do so in different ways."

"The amusement, perhaps, in the purring of the cat. Cats, after they have purred a little, seem to be exceptionally animal animals. Yet the cat purr undoubtedly is an expression of pleasure, corresponding, for example, to the contented smile with which a human being sinks into a comfortable chair."

"But perhaps the most curious way of expressing pleasure displayed by any animal is described by Dr. Milton J. Grooman, of the Witlar Institute, in Philadelphia, as characteristic of some white rats."

"These rats, Dr. Grooman states, express pleasure by clicking their teeth. Possibly the rats method of laughing may be related by some remote evolutionary link to the human laughter's habit of opening and shutting the mouth while emitting loud noises."

London's Latest Craze

Many kinds of aspen cones constitute the latest craze in London. England only a few inches long they are exactly in size, and well-known types are represented.

To lend realism, model hangers, control towers, and club buildings are also to be had, to say nothing of many diminutive accessories.

Synthetic sausage skins are now made from cellulose.

The National Council of Women will press for appointment of women on government boards and commissions.

The council will urge Prime Minister R. B. Bennett to appoint a properly qualified woman to one of the vacancies on the Civil Service Commission, according to one resolution approved. Another resolution, presented by Miss Charlotte Whitton, executive director of the Canadian council on child and family welfare, favored the appointment of women to relief administration boards.

The Union resolution, passed at the spring executive meeting of the council, was referred to the various provincial and local councils for action. Delegates decided to stress the importance of work of the International Council of Women.

The convention asked the Dominion government to instruct delegates to the Geneva disarmament conference to request adoption of a mutual agreement under which governments of the world would assume full control of all factories producing lethal weapons.

After she had talked about things that happened in her girlhood, she was asked what she thought of Miss 1003 with her dance halls, amusements and dress. There was a long pause, then she said, "I suppose you must have it first."

WORLD HAPPENINGS BRIEFLY TOLD

Two days were all that was necessary for the people of Ontario to absorb completely an issue of \$25,000,000 provincial bonds.

It is estimated Chinese sold 50,000 men and the Japanese 30,000 in the internment warfare in North China. Manchuria and Jehol during the past 20 months.

Single workless from Edmonton and Calgary have gone to British Columbia to construct airports under the unemployed relief scheme of the Dominion Government.

Since the beginning of the current crop year, August 1, 1932, Canada's exports of wheat are 57,000,000 bushels in excess of the figures for the corresponding period last year.

Immigration to Canada for the first four months of 1933 totaled 4,162, a decline of 28 per cent. from the same period a year ago, according to figures issued by the Department of Immigration at Ottawa.

Lieut.-Col. P. R. Shields, Calgary, was elected vice-president of the new Canada at the Canadian Air Service Corps annual meeting at Ottawa. Lieut.-Col. F. Hyndman, Vancouver, was chosen western representative on the reserve of officers.

Montreal celebrated the centenary of the foundation of the city with the unveiling of a plaque to the memory of Jacques Viger, Montreal's first mayor, and a ceremonial meeting of the members of the city council.

The King has approved the appointment of Lord Brabner, distinguished barrister, as governor of Bombay in succession to Sir Frederick Hugh Byles, whose term of office expires in December. Sir Frederick has occupied the post since 1928.

The Canadian butter trade has more to fear from over-production of butter for the Canadian market than it has from imports of butter from New Zealand. Hon. H. H. Stevens, Federal Minister of Trade and Commerce, told a delegation from the Okanagan Valley Co-operative Creaming Association.

Seeking Market in Canada

Bermuda Agriculturalists Investigating Result Of Recent Vegetable Shipments

Inauguration of a regular service of vessels between Bermuda and Quebec city is fore-shadowed by W. R. Evans, assistant director of agriculture in Bermuda, who came to study the results of a recent experiment in the shipment of potatoes and celery on the S.S. Chomedy from Bermuda to the food markets of the ancient capital.

The cargo of the Chomedy was the first consignment of Bermudian vegetable products ever unloaded at Quebec.

According to Mr. Evans, Bermuda's vegetable season develops that of Canada.

Old Books First Used

Bible and Prayer Book First Used in Australia in 1788

The first Bible and Prayer Book taken into Australia were used at the recent anniversary service at St. Philip's Church, Sydney. The books were carried by the Rev. Richard Johnson when he sailed, 145 years ago, Mr. Johnson was the first chaplain of the settlement founded in Sydney Cove by the First Fleet bringing settlers to the new continent. Both books bear the inscription "Botany Bay, 1788," but as the sailing of the fleet was delayed they were first used in Australia on January 27, 1788. Ten years later they narrowly escaped destruction in a fire which burned down the first church.

Horse Straining Revived

Horse stealing is not a lost art, according to James Chantwell, who has requested authorities to trace twenty horses missing from his 4,000-acre ranch on the Saskatchewan-United States boundary. An intensive search of the huge range was made for 100 missing horses, but only 80 were found.

Hot Water For Sale

A unique service is offered by Manchester, England. It is the only authority in Britain to sell hot water. House holders buy hot water for the family bath night at a halfpenny a bucket.

Robert Louis Stevenson Invoked

the easy flow of his thoughts by playing the piccolo flute.

Many Acres Under Glass

England Sees Valuable Market For Hot-House Fruits and Flowers

The fact that every tropical fruit and flower can be grown in Britain under glass is beginning to be appreciated and acted upon. Towns of glass are springing up, and experts estimate that there is a market value of \$30,000,000 spent to the enterprises.

Tomatoes, cucumbers, grapes, mushrooms, early strawberries, and raspberries are the chief fruits cultivated at present, but there is no reason why others should not be added to the list. The largest glass-house area in Britain is in the Lea Valley where 1,600 acres are under glass. There are now more than forty-four miles of glass in the sheltered part of the South Down near Worthing, and a new enterprise has been formed to exploit the Worthing hot-house grape industry. The aim is to put 100 acres under glass, employ 600 men and get an output of a quarter of a million pounds of grapes a year. Other areas where hot-houses have been erected are the Heston division of Lincolnshire and the marshland district of Norfolk. The figure of \$30,000,000 is mentioned as the fresh capital recently put into this promising industry, which incidentally gives work to many men who are not gardeners.

Largest Electric Sign

Carries Name Of Founder Of German Dye Trust

Leverkuise, Germany, claims that its new electric sign is the largest in the world. It has been put up to replace two chimneys of the German Dye Trust which are four hundred feet tall and stand nearly two hundred feet apart. In letters nearly forty feet deep a name has been arranged vertically and horizontally, the central letter serving for both. The mole is enclosed in a circle two hundred feet in diameter. Two thousand electric lamps are used. The name is that of the founder of the trust.

Winnipeg Newspaper Union

By Ruth Rogers

The Winnipeg Newspaper Union, which was organized last year, is now in the process of organizing the Winnipeg Free Press staff.

The union is now in the process of organizing the Winnipeg Free Press staff.

Convalescent Homes

Plan Would Greatly Reduce Hospital Expenditures In Ontario

Establishment of convalescent homes throughout Ontario would reduce hospital expenditures and at the same time benefit patients, Hon. Dr. H. A. Bruce, Lieutenant-Governor of Ontario, told the Ontario Medical Association.

Adoption of the plan would reduce the present hospital population by 30 to 40 per cent, he said, and would postpone for years the expenditure of large sums of public money on new institutions.

"Hospital care is imposing a heavy charge upon the people," said his honor. "The per diem cost in modern hospitals is due to a large extent to modern facilities such as X-ray, operating equipment, and the services of a trained staff. These are required for one seriously ill but when a patient has ceased to be acutely ill he or she can be cared for equally as well in a convalescent home in the country, preferably on a small farm. Patients would have the advantage of country air and could be given light employment."

Recipes For This Week

(By Betty Barclay)

FRUIT CARAMELS

- 1 cup figs.
- 1 cup seeded raisins.
- 1 tablespoon candied orange peel.
- 1 cup stoned dates.
- 1 cup walnut meats.

Put in a bowl 2 cups of orange juice. Steam fruit for 20 minutes. Cool and put through food chopper with walnuts. Moisten with orange juice until of right consistency to make into small balls or squares.

STRAWBERRY TARTS

FLAMING

- 1 quart fresh strawberries, hulled.
- 1 cup sugar.
- 1/2 cup quick-cooking tapioca.
- 1/2 teaspoon salt.
- 2 1/2 cups boiling water.
- 2 cups strawberry juice, drained from berries.
- 1/2 cup cream, whipped.

Crush strawberries slightly, add sugar, and let stand 30 minutes or longer. Add quick-cooking tapioca and salt to water, and cook in double boiler 15 minutes, or until tapioca is tender. Stir frequently. Add strawberry juice to tapioca mixture. Chill. Pour 1/2 of this mixture into parfait glasses. Fold cream into remaining tapioca mixture and fill glasses. Chill. Just before serving, top with crushed strawberries. Serves 8.

Close Mounted Police Posts

Reported That Three Posts In North To Be Abandoned

Three R.C.M.P. posts in the far north will be closed under an economy reorganization plan, according to Major-General J. H. MacRae, commissioner of the force.

The posts to be closed are at Llandudno, River, and Wrigley. It is planned to handle the Hay River post from Presville, while Simpson will provide patrols to the Llandudno and Wrigley.

General MacRae plans to go to Edmonton in August for a trip of inspection as far north as Akivik.

A new material for dental plates is said to have unusual strength, to retain its form indefinitely, and to have the natural colour of skin tissue.

Soviet exports from Black Sea ports continue to decline.

ACTRESS POPE'S RIN

Golden Text: "He is risen."—Mark 16:7.

Lesson: Mark 16:1-20. Devotional Reading: Psalm 16.

Explanations and Comments

He is Risen, verses 1-8: "It was after sunset on Saturday when the Jewish Sabbath began, and that three women, Mary Magdalene, and Mary the mother of James, and Salome, bought spices for the anointing of the body of Jesus. His body had lain in the tomb three days, according to Jewish reckoning, for part of a day was spoken of as a whole day. Nicodemus had brought a hundred pounds of myrrh and aloes at the time of the entombment, John 19:39, 40, but of this the women were evidently not aware."

It was very early on the first day of the week, that they came to the tomb. (With the exception of the Sabbath, the Jews gave no names to the days of the week, but the women, Mary Magdalene, and Mary the mother of James, and Salome, bought spices for the anointing of the body of Jesus. His body had lain in the tomb three days, according to Jewish reckoning, for part of a day was spoken of as a whole day. Nicodemus had brought a hundred pounds of myrrh and aloes at the time of the entombment, John 19:39, 40, but of this the women were evidently not aware."

Keen Interest In Silver

Price Means Everything To British Columbia Mining Camps

Silver, subject of many conferences, and plans for boosting the price has taken by storm the mining camps of British Columbia. Silver is everything to the people in the northern districts and is the topic of their talks and thoughts.

Higher prices for the white metal would be the solution to all their problems. Just as the price of wheat is the main interest of farmers on the western prairie, so is the price of silver the hub around which their miners live their lives. They talk silver and dream silver.

Their hopes raised by the advocacy of bimetalists for its redemption, they read every word on the subject of silver and listen eagerly to lectures and discussions. If the price would rise 10 cents, they say, a dozen mines would reopen; if silver should advance to 40 or 50 cents an ounce the country again would be a hive of industry.

Railway Registers Increase

Minister Of Railways Sees Signs Of Improvement In Canada

It was only \$250,000—one grain of sand on the seashore—but it brought a wide grin of satisfaction to the face of Hon. R. J. Manion, Minister of Railways. That sum represented the gain in the revenues of the Canadian National Railways for the 19-day period ending May 31 over the preceding 10 days.

It was the second time since July, 1932, and the first since October, 1931, the revenues of the government road showed an increase and was contrasted by Dr. Manion as another sign that old man depression finally was being tossed to a fall.

Blind 'Phone Operators

About 100 of the blind-ex-service men in St. Dunstan's Institution for the Blind hold positions as telephone operators. A St. Dunstan's man, Thomas Duncan, has been appointed telephonist at the new Hull electric showrooms.

A new war tank has been developed in England that can run on water at six miles an hour and 42 miles on land.

Sales of automobiles in Germany continues to outnumber those of a year ago.

Work of Daughters Of Empire

Distribution Of Milk To Under-Nourished Children One Of Many Efforts

If the Independent Order of the Daughters of the Empire did no other work in the past year, its contribution to the well-being of the Dominion in supply of milk to underprivileged and under-nourished children would in itself constitute a worthy record.

It would be impossible to estimate even the quantity or the sum to which this would run, the national convener of child welfare, Mrs. A. U. de Pencier, of Vancouver, said in an interview at Edmonton. "But it is safe to say that nearly every chapter in the Dominion has participated in this form of relief work," she added.

Mrs. A. Reid Mr. and Miss A. Sherry left on Wednesday for a trip to the Pacific coast.

Miss Mabel Ramsey, who has been attending Normal school in Calgary, returned to her home in Carbon on Thursday night.

Mr. and Mrs. H. C. Wilson were Calgary visitors last week.

Mr. E. Hill returned to Carbon on Friday.

Mrs. J. Hammett and Mrs. C. Keller arrived in Carbon on Sunday and are visiting at the home of Mr. and Mrs. John Atkinson. Mrs. Hammett just returned from a trip to the Old Country.

Mrs. Chris Graham left last Wednesday to visit with relatives in British Columbia.

The weather turned warm this week and so in the shade is about the average daily temperature.

The C.P.W.A. and the Duke of York Chapter of the L.O.O.F. are combining their forces in an effort to clean up and improve the condition of the Carbon cemetery. With this object in view they are having a clean up day on Wednesday afternoon, June 21st, at 10 a.m. Every man and woman in town and country is invited to co-operate in this work and help to make this a real better day and improve the appearance of the resting place of those who have gone before. Take this afternoon and bring what implements you can.

Born, on Tuesday, June 13th, to Mr. and Mrs. Wm. Milligan, a daughter.

The Bank of Montreal is receiving a coat of paint this week. J.G. Reed is doing the work.

Poul Stefan is having a small cellar dug under his back shop. This weather makes some improvements a necessity.

A wedding of interest to Carbon folks was solemnized in Three Hills on June 1st, when Miss Kathleen Kitchin of that town became the bride of Mr. Frank McLaren, of Drumheller.

Mr. McLaren was representative for the Union Power Company in this district for a couple of years.

Grand Forks Athletic Association did posters are now announcing their Sports Day on July 5th. A full list of events to be held will appear in our next issue.

L. B. Hart, director of the Southern Alberta Dairy Pool, attended the annual meeting of that institution in Calgary last Thursday.

Do you owe any accounts at The Carbon Chronicle office? If so, we would appreciate an early settlement.

REWARD

For information regarding whereabouts of English Setter Dog—white with red ears and red patches on side and nose. Name plate on collar—E. J. Rouleau, Carbon, Alberta.

Southern News

Mr. and Mrs. C. C. Perman, together with Mr. and Mrs. Ted Schmidt, left on the 6th for a trip to Bureau, S.D. where they will visit for about a month with relatives.

Some of the farmers in the district report that they had wheat damaged by frost and catches occurring seldom as the result. A good rain would help matters somewhat.

Mr. and Mrs. J.J. Bertsch motored to Keema on Tuesday of last week.

Mr. and Mrs. J. J. Pusch and Mr. and Mrs. J.C. Perman left on Tuesday for Ashley, North Dakota where they will visit with relatives.

Mr. John Leske and E. Bertsen went into Calgary on Tuesday with a load of cattle.

Rev. and Mrs. A. Herten left last week for Hilda, where Mr. Herten will hold Revival meetings.

Mr. and Mrs. Fred Schell, and Mr. and Mrs. G. E. Schell left on Tuesday morning for a trip to California.

Mr. and Mrs. John Metzger and Mr. and Mrs. Fred P. Othausen left on Wednesday morning for Washington, where they will spend a short time visiting with relatives.

Mr. and Mrs. E. Berish and family spent the week end with the E. Yost family in Huxley.

Mr. and Mrs. Andrew Buyer, together with their parents Mr. and Mrs. Jacob Buyer, went to Shelby Montana on Tuesday of this week, where they will spend about a two weeks with Mrs. Andrew Buyer's parents.

The Domestic Animals Act
(Municipalities)

SALE AND REDEMPTION OF IM-
POUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that one Brown horse weight about 500 lbs., age about 12 years, four white feet, white face, no visible brand, was impounded in the round kept by J. C. Perman, located on the N.W. of Sec. 11-23-12 W4, on the 21st day of May A.D. 1933 and that the said animal was sold on the first day of June 1933 to John Perman of Drumheller, Alberta and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.
S. F. TORRANCE,
Secretary-Treasurer,
Municipal District of Carbon No. 278,
Post Office: Carbon, Alberta.

DON'T ATTEMPT TO BE PRINTERS

Don't attempt to be printers. It does not pay you in the end. Instead, have your local printer and other printing done at The Chronicle Office. We will quote you a reasonable price on all work. Not only this—if you are putting on an entertainment, etc. and have your printing done here, you get access to our free reader notice in this newspaper, which is worth more to you than the paltry sum you spend for other forms of advertising.

Don't pass up your local printing establishment when you have printing to do. Your newspaper will keep a newspaper in Carbon.

THESE WILL SAVE YOU MONEY
